ACADEMIC PROJECTS

Web Development	▪ **InvoiceFlow**
	  ▪ **Description:** A web application for invoicing, specially designed for freelancers and small businesses, but can be used for almost any type of business need. With this application, you can send invoices, receipts, bills etc to your clients.
	  ▪ **Technology:** HTML, CSS, JavaScript, ReactJS
	  ▪ **Individual Project**

Web Development	▪ **HostelVibe**
	  ▪ **Description:** Develop a web application which hostel students can use to get their rooms cleaned on flexible timings. The current management system found it difficult to schedule cleaning services as students have varying class schedules which resulted in improper utilization of hostel room cleaning services.
	  ▪ **Technology:** HTML, CSS, JavaScript, PHP, SQL, Bootstrap
	  ▪ **Team Project:** 2 Members

Web Development	▪ **ResideHub**
	  ▪ **Description:** Web Application that is an ultimate destination for buying and renting houses, offering a seamless online experience. Explore a diverse range of properties, find your dream home, and make informed decisions with our detailed listings and transparent information. Welcome to hassle-free house hunting.
	  ▪ **Technology:** HTML, CSS, JavaScript, ReactJS
	  ▪ **Individual Project**
